Laravel	9
Lumen	9
Codeigniter	10
Yii	5
Symfony	5
WordPress	10
OpenCart	10
Docker	6
Ubuntu	7
LEMP	7

Work Experience

Back-End Developer - Jobinja

Oct 2021 – Present

Jobinja is one of the top recruitment platforms in Iran and is famous for easing the recruitment process and finding best fit employees for small to large-scale businesses. Focusing on continuous improvement, capabilities enhancement and optimizing search algorithms is my aim in Jobinja.

Responsibilities:

- Resolving architectural issues by making best-fit solutions
- Continuous collaboration with the product team to achieve all the business goals
- Decision making over the technologies based on business side needs

Achievements:

- Reduced complexities to half due to reanalyzing and implementing the easiest methods.
- Boosting revenue twice as previous season by launching Cv Search Service for employers
- Speedy delivery of services such as NPS and ChatBot with performing analysis, development, test, and launch in two weeks sprints

Technologies and Concepts: PHP, OOP, Design patterns, Docker, Redis, Laravel, Elastic Search

Back-End Developer - Ernyka

Sep 2020 – Sep 2021

Worked alongside a group of knowledgeable colleagues who were very influential. Constant learning was a primary goal so the company was a perfect place for boosting knowledge. Refactored Excoino.com (crypto currency exchange) and changed its monolithic structure to micro service.

Languages (Working Proficiency)

English	Professional
Persian	Native
Italian	Elementary

Responsibilities:

- Feature development, refactoring old core, and using TDD with high code coverage
- Scaling the micro services using restful API and message brokers
- Constructing swagger interface to visualize, standardize and make the API's scalable

Achievements:

- Prototyped an average of 3 new features per month and delivered new features in no time after refactoring the old core and reducing technical debts to zero.
- Increased the performance and speed by 50% after launching the new version of Restful API
- Learned and mastered one technology/concept per month through R&D and used them

Technologies and Concepts: PHP, OOP, Design patterns, TDD, RabbitMQ, Restful API, Laravel

Full-Stack Web Developer - Adora Advertising Agency

Aug 2015 – Aug 2020

I've started as a full stack developer and then as a lead developer managed several projects and gained the CEO's trust by working hard and producing flawless results which made a reputation for me as the most trusted problem solver.

Responsibilities:

- Solution making, development, maintenance, and monitoring of projects
- Database design and query optimization, problem-solving, debugging, testing

Achievements:

- Building a user-friendly prediction system for Footballzone.ir and reaching 10k+ users in the first 3 days of World Cup 2018 and follower growth in social networks
- Redesigning DB and refactoring codes of Shiba Galaxy a social network for the kids with 100k+ users, resulting in perceptible reduction in query execution time

Technologies and Concepts: PHP, JavaScript, Codeigniter, Laravel, WordPress, OpenCart

Web Developer - Parspake Digital Solutions

Sep 2010 – Jul 2015

As a junior web developer, my sole purpose was to learn technical and soft skills from senior colleagues and load of documents around the web. The efforts of those days built my future.

Responsibilities:

- Front-end Development: HTML5, CSS3, JavaScript, jQuery, Themes development (Joomla, OpenCart and WordPress), Responsive and Mobile-first development
- Back-end Development: PHP, MySQL, JSON, SOAP, Rest API, CMS development (Joomla, OpenCart, and WordPress), Framework development (Codeigniter)

Achievements:

- Development of multiple modules, components, widgets, and plugins for major CMS platforms that reduced costs of plugin procurement to 0 for the company
- Creating reusable codes that saved a great deal of time for the company

Technologies and Concepts: PHP, JavaScript, WordPress, OpenCart, Joomla, HTML, CSS, JQuery

Education

Parand Islamic Azad University – Bachelor in IT Engineering

Sep 2005 – Sep 2009

Alborz College – Diploma in Math and Physics

Sep 2001 – Sep 2004

Awards & Certificates

Iran Web and Mobile Festival Award

Best social network of the year 2016 in family and kids category for Shiba Club

Web Development with PHP Course

Issued by Quera in 2020

CIW (Certified Internet Web)

Tehran Institute of Technology in 2009

IELTS

Academic Exam with overall score of 7.0 in 2015

Go Lang (Getting Started with Go)

University of California, Irvine (Coursera)

Functions, Methods, and Interfaces in Go

University of California, Irvine (Coursera)

Hobbies & Interests

Gatherings and spending time with family, friends and colleagues

Study of history, culture and epic fantasies

Learning new languages (Human and Computer)

Playing and watching football

Hiking and camping
